

# Facebook Sustainability Data 2018

Values are rounded; totals calculated before rounding. Values <500 shown as 0.

Every year we evaluate and improve our greenhouse gas inventory methodology. To ensure accurate tracking towards our 75% emissions reduction target, any changes are also applied to our 2017 base year.

\*Other leased data center facilities\* includes leased data center-related facilities that used less than 100,000 MWh of electricity in the reporting year.

## Electricity Use (MWh)

	2014	2015	2016	2017	2018

<b>Total Water Withdrawal<sup>4</sup></b>	<b>662,000</b>	<b>793,000</b>	<b>1,129,000</b>	<b>1,609,000</b>	<b>2,367,000</b>
Recycled Water	238,000	255,000	426,000	469,000	673,000

## Water Consumption (cubic meters)

	2014	2015	2016	2017	2018
<b>Total Water Consumption</b>	data not available	data not available	data not available	<b>838,000</b>	<b>1,201,000</b>

## Water Usage Effectiveness

	2014	2015	2016	2017	2018
<b>Annual Data Center WUE</b>	0.32	0.24	0.21	0.24	0.27

## Water Withdrawal Intensity (cubic meters / monthly active person)

	2014	2015	2016	2017	2018
<b>Annual Water Intensity</b>	0.00048	0.00050	0.00061	0.00076	0.00102

<sup>1</sup>Because we do not control building operations in leased data center facilities, as of 2017, only emissions associated with our IT load electricity are included in our Scope 1+2 emissions.

<sup>2</sup>Scope 3 emissions in this inventory include only select activities and are not intended to represent Facebook's full value chain emissions.

<sup>3</sup>Business travel in 2017 and later includes radiative forcing for air travel.

<sup>4</sup>Notes on Facebook's 2018 water withdrawal: a.) 28% is recycled water; b) 2% is ground water and the remainder is provided by local utilities, and all unconsumed water is returned to utility-owned wastewater treatment plants; c) 35% of water with withdrawal occurs in high water stress areas (determined using WRI's Aqueduct tool); d) Not included in these figures are an additional 1.3 million cubic meters of water withdrawn for the construction of Facebook data centers.
